EXPERIENCE

Sellfire (formerly OPSIQ)

Senior Frontend Developer June 2024 - Present

- Optimized the admin interface and embed functionality of a dynamic form builder handling 1,000+ entries, reducing the build size by 80%, resulting in a significant load time improvement and an enhanced user experience.
- Built a dynamic labeling system enabling administrators to assign labels to representatives, optimizing team management, with future scalability for lead functionality.
- Led the rebranding of OPSIQ to Sellfire, including key features like notifications, Chrome extensions, and reports, resulting in smooth user transition and successful platform overhaul.
- Developed and optimized features that enhanced UX, platform efficiency and reduced bug-related issues, leading to smoother user interactions.

Rapptr Labs

Senior Frontend Developer January 2023 - June 2024

- Spearheaded full development lifecycle for custom CMS projects, enabling extensive client-side customization, resulting in a 30% improvement in client autonomy and reduced developer intervention.
- Led UI/UX enhancements across multiple projects, optimizing performance and improving user workflows by synchronizing admin and assistant portals, resulting in a smoother and more cohesive user experience.
- Maintained and expanded React Native applications, improving performance and reducing critical bugs, ensuring high-quality user experiences and satisfaction.

Bravado

Senior Mobile Developer(React-Native) July 2021 - December 2022

- Developed Bravado's iOS app using React Native and GraphQL, improving app maintainability and increasing performance (e.g., faster load times, reduced crashes).
- Maintained cross-platform parity between Android and iOS versions, improving user experience consistency and reducing development delays.
- Implemented a robust CI/CD pipeline, reducing update delivery time and ensuring consistent deployment of new features and improvements across platforms.
- Designed intuitive and efficient UIs using Emotion and Styled-System, increasing user engagement and improving overall usability based on user feedback and metrics.
- Collaborated with the engagement team to design and develop a public portfolio feature (similar to LinkedIn, tailored for salespeople), increasing user app interaction.
- Managed the implementation of React Native native modules (including share extension), improving app functionality and increasing user interaction with shared content.
- Developed and optimized app navigation structure, reducing user onboarding time and enhancing user satisfaction with more intuitive navigation.
- Converted design mockups into high-quality, maintainable code, improving development efficiency and ensuring adherence to project standards and timelines.
- Implemented the direct messages feature, leading to higher user engagement and retention.
- Developed communication strategies between React Native and web view components, improving app performance and enabling faster delivery of new features.
- Collaborated with cross-functional teams throughout the SDLC, ensuring timely delivery and high-quality releases that improved app stability and user satisfaction.
- Performed comprehensive testing with React Testing Library and Detox, reducing bugs and ensuring an improvement in app stability.

OPay

Frontend Developer July 2020 - July 2021

- Developed reusable React components, streamlining development across multiple products and improving UI consistency, reducing development time.

- Optimized the main website, resulting in a 27% increase in conversion rates.

- Led the modernization of a legacy codebase, reducing technical debt and increasing maintainability, cutting bug-related issues.

- Implemented optimizations on internal dashboards, leading to a significant increase in productivity in the finance department.

- Created comprehensive API documentation, reducing integration time by 27% and improving developer satisfaction and ease of product integration.

- Defined and implemented a value proposition for the JavaScript SDK, enhancing its functionality and increasing developer adoption.

Groove Platforms
Frontend Developer   February 2019 - July 2020

- Developed scalable code for uduX web and iOS apps, improving future development efficiency.

- Integrated a payment gateway using React and Paystack, processing over 1,000 subscriptions, increasing transaction efficiency and revenue by 11%.

- Optimized images, code, and cross-browser compatibility, increasing user engagement and reducing page load times.

- Engineered and maintained efficient streaming and caching of media on the web app, leading to a 21% increase in user retention.

- Implemented performant and crash-free solutions in the mobile app, resulting in a consistent and significant retained audience

- Introduced optimizations to reduce infrastructure costs by more than 10%, improving the app's scalability and cost-effectiveness.

Summitech Ltd
Frontend Developer   June 2017 - February 2019

- Developed reusable and performant code for client and internal projects, reducing development time and improving overall project delivery efficiency.

- Implemented frontend integration testing using Jest and Cypress, reducing bug incidents and improving system stability.

- Collaborated with software engineers, UI/UX designers, and project managers to develop new features, reducing time-to-market for features.

- Developed the Git Explorer web app for the open-source community, receiving thousands of visits and earning positive feedback from developers globally.

SKILLS

Programming Languages:	HTML, CSS/Sass, Javascript, Typescript
Libraries & Framework:	React, React-Native, Next.js,Node.js.
Tools & Platforms:	Git, Gulp, Webpack, Netlify, Vercel, Heroku, Wordpress, Docker, Firebase.

EDUCATION

University of Lagos   Nigeria
BSc. Computer Science   September 2013 - October 2018

AWARDS

Application Security Analyst Mastery Award   IBM
                                                              September 2016
